

Public notice in accordance with the model referred to in section 7

Réseau express métropolitain (REM) de l'Est project in Montréal

This notice is published to inform the public of the commencement of the project's environmental assessment.

The project consists of building an automated light rail system with an elevated and underground route, the Réseau express métropolitain (REM) de l'Est, featuring 32 km of light rail and 23 new stations. This transportation structure project will create new, fast and comfortable connections between downtown Montréal and the city's eastern and northeastern neighbourhoods. The 100% electric network consists of a common segment from downtown Montréal and is divided into two branches, one toward the northeast sector of Montréal, near CEGEP Marie-Victorin, and the other toward the east part of the island, to the borough of Rivière-des-Prairies—Pointe-aux-Trembles.

For more information, the public may consult the project notice filed by its proponent to the Minister of Sustainable Development, the Environment and the Fight Against Climate Change, which includes, in particular, a description of the project and the sites concerned, as well as a description of the main issues identified and impact anticipated on the receiving environment.

The project notice and the Minister's directive respecting the carrying out of the project's environmental impact assessment are available for consultation in the public register of the projects subject to the environmental impact assessment and review procedure, at the following Internet address:
https://www.ree.environnement.gouv.qc.ca/projet.asp?no_dossier=3220-08-001

Any person, group or municipality may submit to the Minister in writing not later than July 7, 2021, observations on the issues that the project's environmental impact assessment statement should address. These observations may be sent to the Minister through the public register at the above-mentioned Internet address.

Further information may be obtained on the project's environmental assessment process and on the website of the Ministère du Développement durable, de l'Environnement et de la Lutte contre les changements climatiques:
<https://www.environnement.gouv.qc.ca/evaluations/inter.htm>

Public notice published on June 7, 2021

This notice is published by CDPQ Infra in accordance with section 31.3.1 of the Environment Quality Act (chapter Q-2), to inform the public of the commencement of the project's environmental assessment. It should be noted that this project benefits from the acceleration measures provided for in the Act respecting the acceleration of certain infrastructure projects (2020, c. 27).
